Note: Schedule subject to change

### Course Details & Expectations

All asynchronous or synchronous course work details and due dates will be included on Canvas for all AIP courses. As classes will be online, good internet connectivity is a priority.

Students will have access to the Canvas course sites and asynchronous course materials in early May. Each course's work prior to the start of the "Live Class" meetings is an integral part of the learning process and needs to be completed prior to the start of the "Live Class" meetings. The asynchronous content and assignments prepare students for class discussions and other graded assignments. Students should budget their time so that they can complete the pre-work during the weeks before the live classes begin.

Students are expected to meet all course requirements, including completing all required tasks prior to the start of live classes, attending and participating in the live class sessions, and successfully completing all assignments and exams. Students taking the full AIP program are expected to be fully engaged with the program's course; students should not be employed, nor accept summer internships. The AIP courses offer concepts and skills necessary for students to continue with the MSA degree program in the Fall, to have a successful career in accounting, and to succeed on the CPA exam.
